

EVERY DROP COUNTS. PLEASE CONSERVE WATER.

B.C. is currently experiencing severe drought conditions. You can help by conserving water and taking actions in your home and around your property to reduce your water use.

- Take shorter showers
- Turn off the tap when brushing your teeth or shaving
- Run full loads of laundry and full loads in the dishwasher
- Lawn watering is currently not permitted in many areas – make sure you are following local water restrictions
- Collect and reuse water for outdoor plant use

Small changes can help have an impact if we work together — and every drop counts.
